

GHAZIPUR LANDFILL NEEDS A PERMANENT SOLUTION

22-October-2019

Figure 1

Ghazipur landfill is located in East Delhi to find a permanent solution to the problem of overflowing garbage at Ghazipur. GRC india organized a meeting on 22nd October 2019, in presence of Shri Gopal Arya ji,

Paryavarán Vibhag (RSS), East Delhi, Member of Parliament Sh. Gautam Gambhir, (Gautam Gambhir Foundation NGO) and all other Senior officials of East Delhi Municipal Corporation with local public.

The landfill is causing **serious environmental problems and “global impacts” in terms of greenhouse emissions.** Harmful landfill gases comprising mainly methane and carbon dioxide have been adding to the air pollution in the region and is one of the biggest contributors to the alarming level of air pollution in the region.

Ghazipur Lanfill side is spread over more than 70 Acres of land. As per the reports total quantity of waste at present is 120 Lakh tonnes with continuous flow of 2,200 tonnes of fresh waste per day. Plz participate in this endeavour.
